

MS, MND, stroke, Parkinson's, epilepsy, brain injury and many other neurological conditions

# Are you being served?

You, or the people you care for, depend on Gloucestershire's NHS and Social Services.

## They are listening.

- Do you work for a neuro charity in a paid or unpaid capacity?
- Or do you look after a friend or family member affected by a neurological condition?
- Or are you yourself affected by a neurological condition?
- Do you fear the effect of cuts and changes in service delivery? Do you feel the NHS or social services should provide better services?

**Become part of a growing movement for change.**  
 Together we will improve the quality and availability of neuro services.  
 The service providers do listen to us.

### So join us!

Send an email to [info@glosna.org.uk](mailto:info@glosna.org.uk), or telephone Milton Borgenstein on 01000-000000 or any GlosNA member.

GlosNA exists simply to improve the services that Gloucestershire's neuro patients receive. Our members are the neurological charities, patients, carers and concerned individuals. We present a single, powerful voice to engage with and influence the NHS and social services.
