

MS - MND - Parkinson's - Epilepsy - Stroke - Brain Injury

Want better services?

No

Yes - please read on

You, or the friend or family member you care for, may need many kinds of support and assistance.

Gloucestershire's NHS and Social Services should provide it.

But we think it can be improved in a number of ways.

If you're affected by a neurological condition, or you look after a family member or a friend who is affected, or you worry about the services provided for people affected by neurological conditions, or you do paid or unpaid work for a neuro charity, **then GlosNA would like to hear from you.**

You can help us influence the quality, availability and scope of the services provided by the NHS and social services in Gloucestershire.

It's what we do.

It could be what you do too.

Send an email to info@glosna.org.uk, or telephone Milton Borgenstein on 01000-000000 or any GlosNA member.

GlosNA exists simply to improve the services that Gloucestershire's neuro patients receive.

Our members are the neurological charities, patients, carers and concerned individuals.

We present a single, powerful voice to engage with and influence the NHS and social services.
